

NOMAD FUTURIST FOUNDATION

The Nomad Futurist Foundation is a 501(c)(3) non-profit organization established to demystify the world of digital infrastructure and the related technologies that impact every aspect of our daily lives.

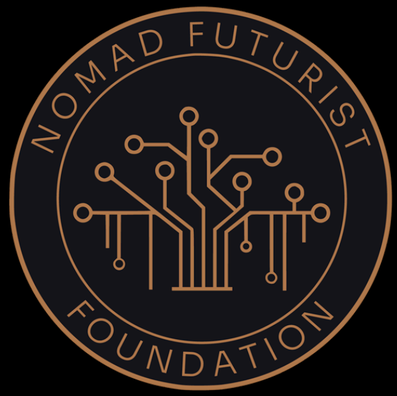

The Foundation

Our Story

At Nomad Futurist, we are on a mission to empower the next generation of talent in the rapidly evolving world of digital infrastructure. Founded in 2021, the foundation was inspired by the popular Nomad Futurist Podcast and aims to break down barriers and demystify this industry for younger generations. Through our work at the Nomad Futurist Foundation, we strive to provide the workforce of the future around the globe with access to education and support that will equip them with skills for success in this fast-paced field. Our unique value proposition lies in creating opportunities for growth and new career paths through understanding digital technologies. With every step we take towards achieving our vision of a more digitally literate society, we pave the way for a brighter future where no one is left behind in this ever-evolving landscape.

Our New Logo

Foundational and Expansive, the Nomad Futurist Logo conveys hope for the Future of the Data Center Industry.

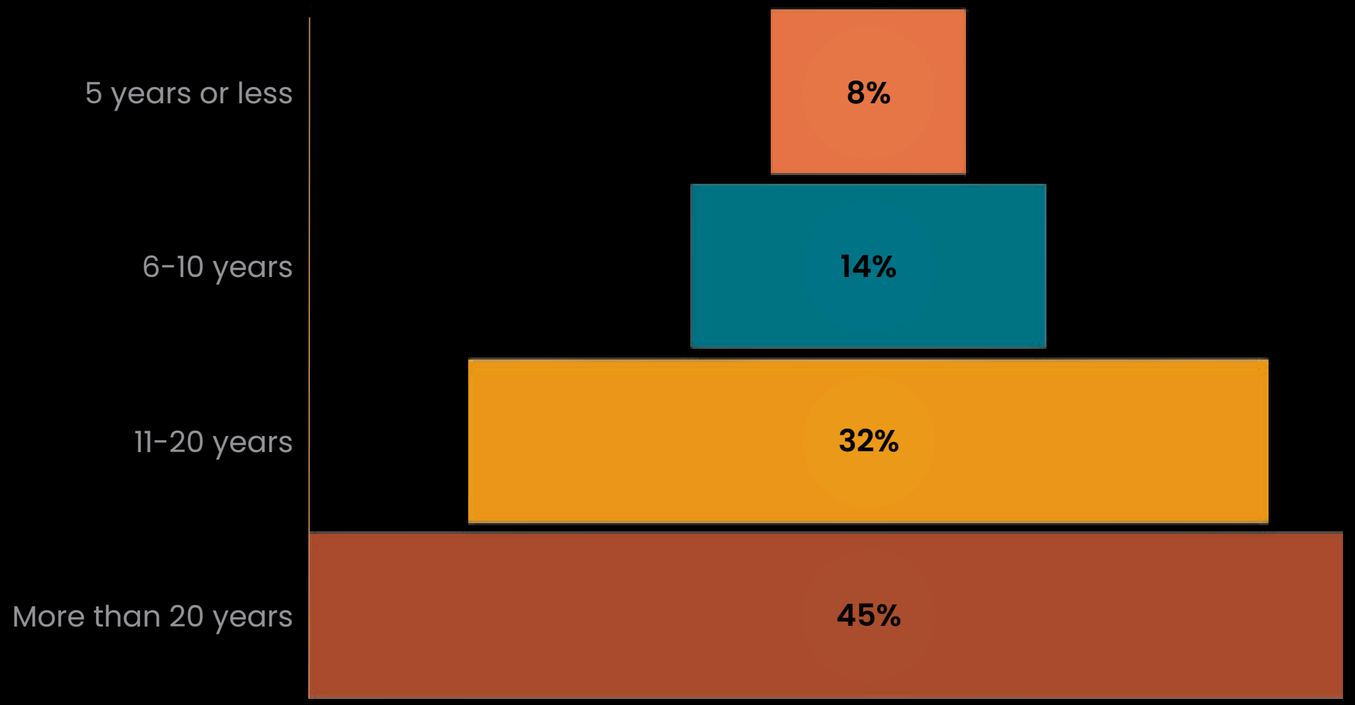

Knowledge and growth
Root-level education
Expansive and inclusive
Paying it forward
Digital future

Human Capital Deficit

A risk that could compound the limited inflow of young talent: large-scale retirement of existing talent within a short time frame. As an industry, we need to transfer institutional knowledge from the legends to the next generation, which takes time and on-the-job training. We, leaders need to ensure these programs are ready for implementation to ensure proper continuity.

Years of Experience in Technology Sector

Underrepresented Groups

The numbers don't lie - we need to do more to get (and keep) Underrepresented Groups in tech.

Instead of simply riding the waves of economic uncertainty — which disproportionately impact women and other underrepresented groups — the sector must redirect its efforts toward creating environments that empower everyone. This includes cultivating role models, establishing mentorship programs, and reforming hiring practices to eliminate unconscious bias.

NOMAD FUTURIST FOUNDATION

Education

The Nomad Futurist Online Academy was created to address the widespread lack of education surrounding our industry. Currently, there is no formal framework for data center education. As an industry, we must take an active role in preparing the workforce of the future. It's a long road ahead — data center education is still in its infancy, and building a strong talent pipeline is essential for supporting the digital future.

Scholarships & Internships

In addition to Industry tours, the Foundation's goal is to provide a platform for the young talent to further their interest in the Digital Infrastructure Industry. Funds created for scholarships and intership will enable the young talent to learn through real life experiences that will help further their career and foster the future leaders of the industry.

Industry Tours

Real-world, tangible experiences are crucial to learning. The Foundation focuses on organizing data center tours with our partners, allowing the younger generation to immerse themselves in the industry and fostering opportunities to further their interest. These tours serve as a stepping stone for young talent to continue exploring the digital infrastructure industry and the diverse career paths it offers.

Community Outreach

The Foundation is committed to educating and raising awareness about the data center industry. By engaging with local schools and supporting them through structured programs, data center tours, and internships, we can increase the flow of young talent. Our vision is to inspire children to say, "I want to be in the data center industry" as they learn about the world. Additionally, there are numerous opportunities to reskill existing talent from other industries.

Speaking Engagements

Through speaking engagements, the Foundation will continue to raise awareness about the importance of the digital infrastructure industry. The lack of education is a critical industry issue, and by focusing on these engagements, the Foundation aims to rally industry leaders and companies to take action in creating educational pathways for the younger generation.

Young Talent Feedback

- *“My favorite part was getting to see the CEO and hearing about how he came from the bottom. It made me realize I could also be the CEO someday.”*
- *“My favorite part is seeing the inside of a data center, I didn't even know about a data center at first, I thought they were just offices.”*
- *“Thank you for taking time out of your busy days to come tell us about your stories. I liked hearing about all the ways all of you made it to the place you are in your careers and showing that there isn't just one path to being successful.”*
- *“Just the knowledge that there are so many different jobs that go into one area of work so that gives me options in different work environments.”*
- *“My favorite thing about this trip was probably finding out how many jobs there are in just one area of work”*
- *“Learning that without the data center, there wouldn't be any internet. Also knowing that without internet, our lives would be changed drastically. Some people might not be able to do their work (job) anymore, complete school assignments, etc”*

The Family

The Foundation relies on our extensive network of industry thought leaders to help spread the word and create content for the online academy, as well as for both local and global initiatives.

- **ADVISORS**

Our advisors are Industry leaders and experts that lend their expertise as the foundation continues to expand.

- **AMBASSADORS**

Our Ambassadors are an extension of the foundation, focusing on community outreach and content creation within their sphere of expertise.

- **ADVOCATES**

Our advocates focus on grassroots outreach within their network.

Our Global presence

NOMAD FUTURIST FOUNDATION

VISIONARY

$50,000 Annual Sponsorship

Industry Leadership & Brand Visibility

Premier Recognition – Your organization will be prominently recognized as a Visionary Partner across all Nomad Futurist platforms, including our website, social media, newsletters, and podcasts.

Brand Placement – Your logo and branding will be featured in exclusive partner spotlights, event materials, and educational content.

Speaking & Thought Leadership – Gain access to exclusive speaking opportunities at Nomad Futurist events and panels, positioning your executives as thought leaders in the industry.
